## FDA Draft Guidance Data Collection Multiple TAY Postings – Data Review

**Scope:** All donors for 2005 with >2 TAY postings were evaluated.

- 51 Donors had >2 TAY postings for low platelet count.
- 50 of the 51 donors gave only single platelet donations this year .
- 48 of the 51 have only ever given single platelet donations.
- Two of the donors were double platelet donors last year; this year they gave singles only, the platelet counts continued to decline and after three consecutive TAY postings they were deferred for prostate cancer.
- One Donor had four TAY postings; he gives doubles and singles, is a 305 time donor, reaches the maximum number of donations each year and is a 72 year old male.

TAY= Temporary Deferral for Other Medical Reasons
